Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • "I don't know which crop will give the best yield this season" • "Fertilizer costs are rising and I can't afford to waste them on the wrong crop" • "I wish there was a simple tool to tell me what to grow"	PERSONA NAME <i>Indian Farmer (Small-to-Medium Scale Agricultur- alist)</i>	THINKS • "Will my crop survive the changing weather this year?" • "Other farmers are getting better yields — what am I doing wrong?" • "Technology might help but I'm not sure how to use it"
DOES • Relies on traditional knowledge passed down from family • Asks neighboring farmers for crop advice • Manually checks soil condition by appearance and feel		FEELS • Frustrated by unpredictable crop outcomes • Hopeful that modern tools can improve farming decisions • Overwhelmed by the number of variables affecting crop selection
